CAREER CONTOUR

Since July 2016

L&T Hydrocarbon Engineering Ltd.

● Since November 2021

*Project Controls Manager
Saudi Aramco – Client*

● July 2016- November 2021

*Executive Assistant
Headed Resource
Department*

January 2015- May 2016

Assistant Manager
Italy & Gurgaon | .S.S Steel Italia
Ltd (Jindal Group)

December 2013- May 2014

Demand & Supply Planner
Italy | Huntsman Corporation

September 2008- September 2011

Senior Engineer Proposal &
Estimation
Chennai | L&T Power Division

CERTIFICATIONS

- PMP Program
- German language A1 & A2 |
Goethe Institute

PROFILE

A Strategic Operational Leader & Project Management Expert with growing success in streamlining operations for large-scale organizations for over 14 years, the highlight of my career has been on setting and executing core operational plans that have led to substantial improvement of revenue, customer satisfaction, cost effectiveness, with prime focus on Business Strategy, Global Operations, Project Management, Process Excellence, Digital Transformation, Quality Management, Client Servicing & Stakeholder Management predominantly across the manufacturing industry.

Currently spearheading as Project Controls Manager, Saudi Aramco at L&T Hydrocarbon Engineering Ltd. Recognized as a perfect team manager having the ability to lead multi – functional & multi-cultural global teams and integrate their efforts to maximize operational efficiency and implement best solutions

LEADERSHIP QUOTIENT

- Expertise in creating sophisticated business operating models, expanding business for the company and catapulting them towards profitable business ventures & increased revenue growth.
- Lead a variety of strategic efforts inclusive of playing a pivotal role in building annual/long-term strategic plans. plays a key role in strategy formulation, collaborates with both internal & external stakeholders
- Adept at implementing overall project controls direction through application of systems and methods for estimate development, cost control, planning and reporting, progress measurement, schedule development/control and management of change
- Manage the complete Project Management Life Cycle encompassing Project Scoping, Requirement Analysis, Technical Specifications, Risk Management, Monitoring & Tracking & Process Compliance
- Streamlining processes & systems with an understanding & continuous optimization of resources, KPIs, SLAs, objectives & targets
- Experience in managing/ streamlining production processes especially while manufacturing machine components. Possess knowledge in identifying and rectifying problems, troubleshooting, conceptualizing and implementing measure for increasing operational efficiency.
- Understanding of all aspects governing operational activities & up to date knowledge of latest technological advancements, regulations/ guidelines and statutory compliances in the industry Networking with clients & vendors, as well as form a dream team of experts for each project to maximize resources & efficiency
- Geographic Exposure: Saudi Arabia, India, Italy etc.

AREA OF CRITICAL IMPACT

BUSINESS STRATEGY

- Responsible for the development and oversight of the business's corporate strategies in order to support growth objectives while strengthening the business core to develop and maintain a competitive advantage.
- Develop corporate plans and budgets by playing a lead role in all the planning and budgeting activities performed by the business. establishes and reviews key strategic priorities and translates them into actionable and quantitative plans.

SIGNATURE SKILLS

STRATEGY & VISION:

- Strategic Initiatives & Operations
- Project Management
- P&L Responsibility
- ROI Accountability
- Business Analysis
- Production Management
- New Product Development

BUSINESS PROCESS:

- Project Management
- Business Operations & Support
- Process Enhancement
- Contract Administration
- Costing & Budgeting
- Risk Assessment / Disaster Recovery
- Audit/ISO Documentation
- SLA (TAT) Adherence
- Knowledge Management
- Quality & Process Compliance
- Documentation & Reporting

STRATEGIC RELATIONS:

- Stakeholder Management
- Resource Localization & Optimization
- Client Servicing
- Vendor Management

ACADEMICS

● 2014:

Master of Science in Management, Economics Engineering from Politecnico Di Milano (Como Campus, Milan)
Gold Scholarship Recipient

● 2008:

Bachelor of Engineering in Mechanical Engineering from Anna University

- Play a highly collaborative role and will routinely work with the business's senior executives in setting the vision and agenda of the business and work with the day-to-day planning teams in developing a clear roadmap that will realize the business's vision

PROJECT MANAGEMENT

- Provide overall project cost, schedule, estimating, progress measurement, and change management leadership and expertise.
- Manage Project Cost and Schedule throughout the project life cycle
- Fully understand the scope of the project, contractual requirements, identify the major milestones and set clear priorities for the project team
- Serve as a link to the Project Services Common Skill Center organization; gain alignment for support and approval of key deliverables (i.e. Estimates Development Plans, Estimates, etc.)
- Develop and maintain the Project Controls related plans and procedures
- Participate in kick-offs and ongoing meetings with the Engineering, Procurement and Construction (EPC) contractor to ensure common understanding of project controls requirements
- Stewards Project cost/schedule with ongoing project analysis, reporting, forecasting, budgeting and Change Management
- Develop cost and schedule estimates to support opportunity assessments, Project funding, Project reviews, and ad hoc requests

PRODUCTION OPERATIONS/ NEW PRODUCT DEVELOPMENT

- Successfully achieved:
 - In-process quality yield improved from 80% to 97% by changing technical modifications of the process, reducing customer complaints.
 - Acquired 80MT orders for the auto segment from a single supplier by improving upon production capacity from 2 MT to 3 MT.
- Responsible for drawing production plan for stainless-steel tube of TIG welding machine, implementing QA systems and procedures, providing technical support, effectively deploying resources and promptly resolving complaints to improve overall production, quality and productivity.
- Formulate consumption norms of raw materials and introducing process improvements to control wastages and enhance operational efficiency.
- Drew requirements of raw materials to support production plans, monitoring stock levels and coordinating with purchase to ensure timely availability of all inputs. Carry out detailed planning and scheduling to ensure smooth operations and meet the pre set production targets.
- Carry out stage by-stage inspections and test to ensure adherence to technical specifications and quality standards and reduce rejections.
- Accountable for planning production schedule & resources to meet production target, delivery dateline & quality standard.
- Facilitate timely conduct of quality audits while coordinating with auditors; significantly contributed in carrying out internal audit related to the ISO to ensure quality culture across the organization.
- Collect and collate quality related data; generate periodic reports and carry out value added analysis of the reports to identify quality issues and develop need-based rectifications.

RESOURCE OPTIMIZATION

- Recruit, guide, mentor, motivate and oversee daily activities for a multi-cultural project team of XX+ members including engineers, supervisors, foremen and workforce from varied backgrounds.
- Encourage & support positive employee relations, open communication & teamwork both internal and external.
- Develop and lead a multi-skilled team to ensure timely delivery of the projects and organized well-structured training programs to enhance skill sets and create awareness of the latest developments

STAKEHOLDER MANAGEMENT

- Prepare and present various reports on overall Metrics encompassing TVM, PO/TO ageing, Retro-Payments, Supplier Risk assessment, audit ageing & recoveries to aid them in critical decision making process
- Manage key accounts with focused approach & nurturing relations for productive business relations
- Maintain cordial relations with key clients, ensure repeat/referral leads & convince them to participate in new programs

PROCESS ENGINEERING

- Streamline & automate processes, establish quality assurance framework for achieving delivery excellence & implement best practices
 - Formulate strategies, drive process excellence initiatives, derive substantial improvements across diverse business processes with implementation of methodology, preparing Process Dashboard, SLA Report, Balance Score Card to assess the performance of the process
 - Optimize the process to maintain high product quality, improve process portability, increase process robustness, improve process efficiency, and reduce manufacturing costs
 - Manage systems for identifying and monitoring process metrics to maximize performance with responsibility for productivity/rate, monitor the 'Process Control Plan'. Develop process maps to understand As-Is & To-Be scenarios
 - Prepare documents like Process Flow Diagram, Control plan, PFMEA, Control plan, SPC, MSA, Work Standards, Process mapping etc.
-
